OFFICE OF THE CITY ENGINEER

RE: FarmHouse Fraternity
TSC Project #4255.005

Michael:

This letter is a request to be heard at the February 18, 2015 City of West Lafayette Board of Works meeting to hear and approve the variances from the Stormwater Technical Standards for the above referenced project. The variance is as follows:

1. Variance from Table 6.1 of the City of West Lafayette Ordinance that determines the allowable stormwater release rates for proposed developments. Based on the size of the site (0.53 acres) these rates would be very low. Given the minimum size of the outfall control orifice (4") it is not feasible to meet these release rates. Instead the proposed release rates, during the 10-year and 100-year storm events, will be less than the existing release rates by over 50%.

If you have any questions, please contact me at 237-5249 to discuss.

Sincerely,

A handwritten signature in black ink, reading 'James E. Pence'.
